Program Evaluation: An Introduction To An Evidence-Based Approach

Synopsis

PROGRAM EVALUATION, 6th Edition helps readers learn how to evaluate services and programs that they will encounter in their professional practice. In the process of learning evaluation techniques and skills, readers will become proficient at critically analyzing evaluation studies conducted by others. The authors present and simplify all the essentials needed for a critical appreciation of evaluation issues and methodology. The book's clear writing style and clear presentation of concepts, as well as its hands-on and applied focus, will guide readers on how to gather evidence and demonstrate that their interventions and programs are effective in improving clients' lives. This edition's up-to-date coverage includes a greater number of references to current literature, emphasizing that consulting the literature is an important step in recognizing, developing, and evaluating evidence-based practice or research-informed practice.

Customer Reviews

David Royse is a professor in the College of Social Work at the University of Kentucky. He earned his Ph.D. from Ohio State University in 1980. He has written several books, including two for Cengage Learning: RESEARCH METHODS IN SOCIAL WORK, Sixth Edition, and PROGRAM EVALUATION: AN INTRODUCTION TO AN EVIDENCE-BASED APPROACH, Sixth Edition. Bruce A. Thyer, Ph.D., is Dean and Professor, School of Social Work, Florida State University. He earned his Ph.D. in Social Work and Psychology from the University of Michigan in 1982. Recipient of a National Institute of Mental Health Faculty Scholar Award, Dr. Thyer has published extensively on

social work practice, research, and evaluation. Deborah K. Padgett, Ph.D., MPH, is a professor at the New York University School of Social Work. She received her doctorate in urban anthropology in 1979 and completed post-doctoral programs in mental health services research at Columbia University School of Public Health (1985-86) and Duke University Department of Psychiatry (1994-95). Dr. Padgett's research interests include breast cancer screening and follow-up care for medically underserved women and qualitative studies of the 'process' of care for psychiatrically disabled homeless adults.

It covers evidence based research for community evaluations in an understandable manner. I would recommend for any novice as myself

great

As expected.

Helpful but dry

I hate this book! I purchased it because I need it for my graduate class. Buying ebooks can be a pain in the a** When you are required to submit an access code, so that you can access it online or use any other "helping" tools that a book may provide, sellers almost never have that access code available. This is my last semester, so I am done with buying all these expensive books. Now I can purchase the books that I really want to read, not the ones that I am "forced" to buy.

An utterly useless book. Nothing is bolded, makes I hard to easily locate important terms. Google is cheaper.

I've already found several typos and I'm only a few chapters in; quite annoying for such an expensive book! Definitely not worth the price, but it was required for class.

This book came on time and it has been very helpful not only with my projects but also with the class in general....
