Dermatopathology: Diagnosis By First Impression

Synopsis

The atlas that helps you differentiate visually similar diseases Written with the dermatology trainee in mind, *Dermatopathology: Diagnosis by First Impression* uses more than 800 high resolution color images to introduce a simple and effective way to defuse the confusion caused by dermatopathology slides. Focused on commonly tested entities, and using low- to high-power views, this atlas emphasizes the key differences between visually similar diseases by using appearance as the starting point for diagnosis. The Third Edition provides: 800 high resolution and annotated photographs, now all fully downloadable 'Key Differences' to train the eye on distinctive diagnostic features Disease-based as well as alphabetical indexes 75 new interactive self-assessment questions to perfect your diagnostic skills Brand new algorithms for pattern analysis *Dermatopathology: Diagnosis by First Impression*, Third Edition, once again provides simple and effective guidance to help you approach dermatopathology and accurate diagnosis of skin disease.

Customer Reviews

“In essence, this is an atlas with photographs of many of the most important features which help in the diagnosis of dermatopathologic conditions.” (“Doody’s”, February 2009) “This is a high quality book that would be useful to help prepare for board examinations or to help learn dermatopathology initially.” (“Doody’s”, 27 April 2012)

The atlas that helps you differentiate visually similar diseases Written with the dermatology trainee in mind, the third edition of Dermatopathology: Diagnosis by First Impression uses more than 900 high-resolution color images to introduce a simple and effective way to defuse the confusion caused by dermatopathology slides. Focused on commonly tested entities, and using low- to high-power views, this atlas emphasizes the key differences between visually similar diseases by using appearance as the starting point for diagnosis. Key Features

- Contains over 900 high-resolution color pathology slides, all fully downloadable from a companion website
- Includes “Key Differences” to train the eye on distinctive diagnostic features
- The only dermatopathology book to be arranged by microscopic morphology rather than by disease
- Includes 75 brand new interactive self-assessment questions and answers to help improve your diagnostic skills, available on a companion website

Dermatopathology: Diagnosis by First Impression, Third Edition, introduces a simple and effective way for you to approach dermatopathology and is an ideal resource for dermatology and pathology trainees and Board review.

As expected. Very helpful.

This text is a must-have! It very clearly elucidates diagnostic entities that can very difficult to distinguish to an un-trained eye. In addition to providing an over-arching framework on which to base one's dermpath knowledge, this text also draws one's attention to crucial subtleties, helping to create a deeper understand in the reader. Since starting this book I have already noticed my ability to get the correct diagnosis on 'unknowns' in our dermpath slide set has dramatically increased which is very exciting! In addition to the rich content, the textbook itself is the perfect size to be a companion text....one that I can actually bring with me to study, whether in clinic or at the microscope. I am extremely pleased with this text and highly recommend to anyone with an interest in dermatopathology or a desire to deeper their understanding of dermatologic conditions.

Great help in creating a histologic differential diagnosis. Very useful
