# National Geographic Readers: Water

## **Synopsis**

Water is all around us; we drink it every day. In this level 3 reader, kids will learn about the water cycle, discovering how rain and snow flow into our lakes, rivers, and oceans, and later evaporate into the sky again. Vivid photography and accessible text make this book an ideal introduction to the science of water.

## **Customer Reviews**

MELISSA STEWART is the owner of Honeybee Productions, an editorial services company. She has written many celebrated nonfiction books for children, including numerous National Geographic Readers.

Got this for our Brownie Wonders of Water Journey as an additional resource. Our school uses the "AR" reading scoring system and this is in their listing so the girls could get points. Not all of the other extra books I looked at provided this extra incentive.

The national geographic level 2 and 3 readers have made reading so much more fun!

Grandson was very interested.

Like all the books in this series, nicely written, great photos and good overview of information.

It was fun and informative for my grandson.

Interesting information

You can't go wrong with this National Geographic book. Large print, too.

Great books for kids.
