# Practice Management And EHR: A Total Patient Encounter For Medisoft Clinical

## **Synopsis**

Practice Management and EHR: A Total Patient Encounter for Medisoft Clinical is a unique one-semester text designed to teach allied health students how to work with an integrated practice management and electronic health record program. It covers EHR and insurance and patient billing so students obtain a comprehensive picture of documenting the administrative and clinical tasks that take place during each step of the patient encounter during an office visit. It prepares students for employment in both administrative and clinical positions in a medical office. Visit the PMEHR OLC

## **Book Information**

## **Customer Reviews**

Susan M. Sanderson has authored all Windows-based editions of Computers in the Medical Office. She has also written Case Studies for use with Computers in the Medical Office, Electronic Health Records for Allied Health Careers, and Practice Management and EHR: A Total Patient Encounter for Medisoft® Clinical. In her more than fifteen years™ experience with Medisoft, Susan has participated in alpha and beta testing, worked with instructors to site-test materials, and provided technical support to McGraw-Hill customers. In 2009, Susan earned her CPEHR (Certified Professional in Electronic Health Records) certification. In addition, she is a member of the Healthcare Information and Management Systems Society (HIMSS) and the eLearning Guild. Susan is a graduate of Drew University with further study at Columbia University.

If you are going to use Medisoft, this book seems to be a very good reference guide for basic information and concepts and for step-by-step procedures. Sometimes we don't do some task regularly and we might forget how something is done... this book can be useful in those cases.

It explains the process, and maintain medical records of hospital and clinic patients in a manner consistent with medical, administrative, ethical, legal, and regulatory requirements of the health care system. Process, maintain, compile, and report patient information for health requirements and standards in a manner consistent with the healthcare industry's numerical coding system

Perfect clear for my class

Ok yes the nook is in great shape but to bad they sent me the wronge book and it is even one that was alot cheaper then the one i paid for the book i paid for was \$68's and they sent me one that was only \$17 I'm so mad class starts in 4 days and now i will never great the book i need in time

it said it had a code and it did not !

The book I ordered was in excellent condition and had all the extras. Service was prompt well with in the time frame I expected. Will do business with Chick's Picks again if they have what I need in text books.

I did not get the access code that was suppose to come with the book. That was the only reason I ordered this book because it says that the book comes with the access code.

It is a manual for reimbursements in the medical facilities what else is there to say about this book.  
:P
