The Home Distiller's Workbook: Your Guide To Making Moonshine, Whisky, Vodka, Rum And So Much More! Vol. 1

Synopsis

Get the eBook version FREE* with purchase via 's MatchBook service. I wrote this book to pass along the knowledge that was taught to me in the hills of Kentucky over 25 years ago. Along the way though I developed my own style. I boiled down what I learned and moved it indoors. Iâ™ve developed designs that can be used right in the comfort of you own kitchen or out back in the woods! The truth is that Moonshining, aka âœHome Distillingâ• is a folk art that helped build this country. Together we can make it live again, and have a little fun in the process! âœBut isnâ™t this dangerousâ• you ask. Cooking up spirits isnâ™t any harder then properly roasting a Thanksgiving turkey. In fact itâ™s so easy that a redneck like me can do it. And folks if I can do it, then imagine what you might be able to create! Imagine the holidays when you pull out your own special label. Think of the drinks and dishes you can concoct. Open up a whole new world of creativity and step into the hobby that is truly one of the founding traditions of our country. There are dozens of reasons why people look into home distilling. Maybe you are looking for a new culinary branch to explore, maybe you just like the idea of knowing how to do things for yourself, perhaps you just like to keep the old ways alive or maybe you are just tired of our government telling us what we can and can not do! In this book I will show you how easy and safe this hobby really is. This book is designed for the beginner distiller and I take the time to introduce you to all the concepts of distilling that you need to get started. One of the great thing about distilling is that you can keep it simple or as get as complicated as you could possible want. This journey is all about where you want to take it. Please be advised that this is for informational purposes only. After you read this you will understand just how easy it is to make your own Moonshine, Whiskey, Vodka, Rum or even alternative fuels. Then once you understand how easy this is, how safe and how stupid the laws that restrict this are, then you can contact your congressman and/or senator and tell them to repeal the laws that are only in place to protect big businesses. Believe it or not there are Moonshiners everywhere, we have a grand tradition that goes back to the first settlers. Many historians will even tell you that it was moonshine that built this country! It's time to take back our heritage. Thank you for your support! Jeff King Moonshiners Unite! *Note that all books published by FOI Publishing are DRM FREE as well as MATCHBOOK ENABLED. Jeff King was born in Heidelberg Germany in 1969. His father was shortly thereafter discharged from the Army and the family moved back to the Midwest where Jeff spent his early years attempting to recreate Huck Finn's aquatic adventures . This was just the beginning of Jeff's passion for travel and adventure! He has lived and traveled all over the US and abroad with a current tally of 42 states and 24 countries. Jeff has also sailed in two oceans, two seas and one gulf. Not the kind of person to stay in one place too long Jeff's wanderlust has also lead to a multitude of careers. A true entrepreneur Jeff has lead business endeavors that include importing Art from Bali, Running a Video Game studio, PR for a top Silicon Valley marketing firm and even a brief run for local office as well as starting over half a dozen other small businesses, some successful and others that were more of a, well, "learning experience". But it's what he does when he's not in the office that really makes for an exciting tale. If there is a sense of adventure or uncharted waters ahead you can be

sure that he is the first to sign up. From learning the art of Moonshining in the hills of Kentucky to getting lost in the jungles of Central America, fly fishing the Yellowstone river in Montana, white water rafting in the Sierra's or even single handing a sloop through the islands of the Caribbean.

This book was massively disappointing, I don't know how it has so many positive reviews. First of all, the book is tiny. It's got 80 pages of large print, widely spaced text with a few basic diagrams thrown in. If you shrank the print size and spacing down to normal book sizes I think you'd be looking at about 40 pages, which is pretty paltry. I read it in about an hour. Second, the information presented is poorly laid out, frustratingly lacking in detail, and poorly edited. The book jumps around with little sense of flow, repeats itself, and uses Wikipedia as its only reference. Third, despite promising to in the title, it doesn't actually teach you to make Moonshine, Whiskey, or Vodka!! It doesn't seem like too much to ask a book to actually deliver on the promises in its title, but incredibly this book fails at that. This book gives sketchy "recipes" without any details on what to do with the ingredients for Moonshine, Whiskey, etc... but amazingly says right there on page 60: "In this book we don't really have time to cover everything...so we are going to make rum." Then the author says that if you want to actually learn all the steps for making something other than rum, you'll need to buy his other books!! What kind of shady bait and switch nonsense is this? Finally, as other reviewers have noted, the author has a bizarre habit of arguing nastily in the comments with folks who give his book low reviews. Had I read the reviews more thoroughly before purchasing this I would have seen the warnings for everything I've listed here, noted the strange way the author responds to constructive criticism, and gone elsewhere. There are other, much better books available. If you want a short and sweet guide to whiskey and distilling that actually provides all the steps you will need to make your first batch of whiskey or bourbon I recommend How to Make

Whiskey:http://www..com/How-Make-Whiskey-Step-Step/dp/1480174408/ref=pd_sim_b_1?ie=UTF8&refRID=1EW7Q3MVSZRZ54CEAREJD

Really simplified information that does not explain in detail. Its a quick read. It has a few recipe ideas for the each different type of spirits vodka, rum, gin, etc.

I enjoyed this quick little book. It looks like the author has the process down from what I understand. The best way to learn a thing is to do that that thing.

Thank you for putting this together for your readers... interesting and NOT Dry...I plan on contacting

Congressmen (Representative and Senators) to push for our exemption

All I needed to know in this one book !

As a beginner I refer to it a lot. For me it was I needed to get started but wish there was a little more detail. Meaning if you don't know anything about distilling you need every detail even if it's boring.

maybe a little more advanced info then a beginner needs but still lots of good stuff.

Gets into the nuts n bolts of distilling. Makes for a good read.
