Finally, a book with an actual assortment of projects. I think just about anyone can find projects in this book they would like to make. I've been sewing for many years professionally, while my daughter has only just started. We were both able to pick out projects from this book. There are a few simple projects where the author assumes you know the steps, so I wouldn't suggest that it's perfect for brand new beginners. However, if you've completed a few basic projects, this would be an awesome investment. I bought it used in new condition and got it at an amazing deal. I'm considering ordering my mother one as well. There are a ton of gift projects that could be done in two hours or less, which is part of the appeal for me.

This book is incredible. My daughter is 14 months old and I can find literally dozens of things in here that I can make for her right now, and dozens more that I'll make once she's bigger! I love the way the book is laid out, the clear pictures, and the simple instructions. I would highly recommend this to anyone who is looking for a book to get them started sewing for a little person!

All the patterns are in the front of the book. The book is well laid out with great pictures and the instructions are easy to follow. And because the projects are so small, you can do several and not get overwhelmed. Would be great for a sewing grandparent for grandchildren or a great source of projects for an Etsy store.

I was very disappointed that the dress I bought this book for was only given in a size 2 pattern. I needed a 4. I wasn't near as impressed with the projects in this book as I was the One Yard Wonder fabric to fabric.

Great book and wonderful patterns!

I love the one yard wonders books! There are so many great projects in here for anyone with little

ones around. From basics, like sheets and undies, to more complicated projects like tops with shirring and stuffed toys, even a playhouse, there is something for everyone and every ability level. I have already made several of the projects in this book and will definitely be making more! I can't wait to see what the next one yard wonder is!

I love this book! I think this is her best one yet. I have at least 20 items tabed that I want to make. So for the grandchildren and some for my grown children. Not all item's are just for kids

I love this book and I love this whole series! They are quick and fun projects that make great gifts. With this book, you have pretty much anything you would need to make for a little one. Worth every penny!
