NCLEX® Review 4000: Study Software For NCLEX-RN® (Individual Version) (NCLEX 4000)

Synopsis

This comprehensive NCLEX® review program is designed for individual student NCLEX® review. The popular NCLEX® 4000 study software provides more than 4,000 NCLEX®-quality review questions covering all 29 topics in five major content areas, including fundamentals, pediatrics, psychiatric-mental health, maternal-neonatal, and medical-surgical nursing. The software delivers NCLEX®-style multiple-choice questions and alternate-format questions. Three study modes-pretest, review, and test-give correct and incorrect answers with rationales and new supporting references. NCLEX® 4000 includes important new questions on prioritizing and delegation, a key topic on the NCLEX® exam. Updated to reflect the National Council of State Boards of Nursing's latest test plan, including all forms of alternate-format questions.

Customer Reviews

I bought this software in order to practice NCLEX questions during my nursing program as it is also available at the college campus only. Since I found that I had less time to hang out in the nursing computer lab than to practice the questions at all hours of the day at home I figured I would invest in the program for home use. NOWHERE IN THE DESCRIPTION DOES IT SAY "NOT COMPATIBLE WITH MAC COMPUTERS" SO, I never questioned its purchase. Well, silly me. I received the disc and tried to install it onto my Macbook. Guess what? NOT COMPATIBLE. Which I only found out once I unwrapped the software and pulled the CD out of its sleeve. If you only have access to MAC

DO NOT PURCHASE. Luckily I still had my windows pc from 2003 I could unpack and install it onto. Material is good for testing, but don't buy it if you have a mac. That is all.

Once I uploaded the disk, it told me that it can not run on my system. I needed to get a patch for it to open. I called and they took my email to send it to me. Nothing. I gave it a day and then had to call back only to find that there was no info for my email on file and nothing was sent. It had to be resent. Because I ordered this and got it on a Saturday, couldn't call til Monday for the patch, then Tuesday again. So to have a disk to study from that doesn't work right away was not worth the money for a hassle to me. I even tried it on other computers with different operating systems all to say the same thing. Once I actually got to open this, I do like the format questions and the breakdown that you can make a test from. They also have alternate format questions which are good to practice. If you don't mind a hassle or can get it before a weekend then it might be a good choice.

First hassle, I had to download a patch to use this with a Windows 7 64 bit OS. Then, when I'm taking tests sometimes the text of the question is blank and I have to go on without answering. My instructors require me to submit 500 NCLEX questions at 90% correct for each rotation (e.g., peds, med/surg, etc.). Being forced to skip questions because I cannot SEE them is a problem! Most disappointing is the fact that these questions differ very little from NCLEX 3500 which is available for FREE online. Finally, there should be a way to track your history of tests and results so you can see your progress over time. Overall, I feel this product is pretty useless. My advice to nursing students: Don't waste your money on this. Do the NCLEX 3500 questions for free and spend your cash on something else.

Doesn't work always has an error message pop up so I called the customer service and they told me the only way to fix the problem is to have remote access to my computer to download a patch. I asked if they could email me the patch and they told me no they need to remotely control my computer to download the patch.

Huge database of questions. You can select what area you want to test in and how many questions. There is an option to do a practice test (which is not graded) or a real test. The practice test gives you the correct answer & rationale with each question as you go. The real test you can review the question & answers you got wrong after completing the test. I got this because it was required from

the nursing program I am in. I find it very useful.

Sucks! Don't purchase, you can only use it on windows program. Not for Apple users and no downloaded version available!

I did all of these 4000 questions in about 1 month. I took the NCLEX 2 weeks later and I was the first one done in the room. That worried me, but it was because I answered most of my questions correctly. The more you get right, the sooner you are done with the test. I am glad I bought this product.

I'm in my second semester of nursing school. Since I started using this as a supplemental studying tool, mid semester, my grades my grades have sky rocketed. The rationales are great and pop up whether the answer is right or wrong. Definitely plan on using this the remaining two semester, and as a study tool for the NCLEX!!
