The Allergy Solution: Unlock The Surprising, Hidden Truth About Why You Are Sick And How To Get Well

Synopsis

“The Allergy Solution is a game changer.” David Perlmutter, M.D., #1 New York Times best-selling author of *Grain Brain* An epidemic of allergies is spreading around the world. One billion people suffer from allergic diseases such as asthma, hay fever, eczema, and food allergies. But this is just the tip of the iceberg. In this eye-opening book, award-winning integrated-medicine expert Leo Galland, M.D., reveals the shocking rise of hidden allergies that lead to weight gain, fatigue, brain fog, depression, joint pain, headaches, ADHD, digestive problems, and much more. Astonishing new research shows how each of these is linked to the immune imbalance that is at the root of allergy. A brilliant clinician, Dr. Galland has unlocked the power of this breakthrough science to help thousands of patients who have struggled with mysterious symptoms answer the question: “Doctor, what’s wrong with me?” In *The Allergy Solution*, he is joined by his son, Jonathan Galland, J.D., a passionate health writer and environmental advocate, in exposing the truth that just as the earth’s environment is out of balance, our bodies are out of balance. The modern world, with pollution, unhealthy eating habits, lack of exercise, and excessive exposure to antibiotics, is fueling the rise in allergies. *The Allergy Solution* takes an in-depth look at how we can balance immunity through nutrition and lifestyle to reverse allergies without drugs. It offers an easy nutritional program, starting with a Three-Day Power Wash designed to “clear the tracks,” to help us take back control. Do you suffer from asthma, eczema, or sinusitis? Are you sick of pain, fatigue, brain fog, weight gain, depression, anxiety, or wondering what is behind your mysterious symptoms? Let Dr. Galland’s clinical experience and unique insights into cutting-edge science guide you back to health.

I was one of the people born in the 50s when breastfeeding was unfashionable, and got a double whammy from being born Cesarean birth. The tipping point was getting a root canal at age 15: I've battled allergies ever since (now 60). I learned that taking drugs did NOT treat the cause and only created more health problems. For example, if you take steroids or antihistamine, you may get temporary relief, but you could become obese and get osteoporosis--worse than the allergies! I love this book because the good doctor covers all the ROOTS (causes) of this issue, including FOOD (which is a huge factor in my case). He discusses how almost every symptom you have can be related to allergies, which even mimic diseases. (My question here is: Are all diseases, at their root, allergies caused by all the new chemicals and food toxins?) He teaches you how to journal every day to uncover the food or environmental issue that is causing your symptoms, something I've found useful for years. He points out that allergies are increasing dramatically due to our way of farming (just wish he'd mentioned GMOs!), and stresses the importance of ORGANIC (pay now or pay later). He provides a power cleanse with simple soup and smoothie recipes, and a guide for slowly reintroducing new foods to discover which ones you're allergic to (in three stages). Though I have read several HUNDRED books on health, which is my passion (even written and published a couple myself) I found this a worthwhile read as I learned new tidbits, including the following: WHY we should make ours a "shoe-less house," details about "third hand" smoke, the curative power of

flavonoids and which foods have them, the vicious cycle of allergies and weight gain (exacerbated by allergy drugs), the power of adinopectin to decrease allergies and weight, the allergy link to eating fast foods, and much more. There is even a separate chapter on rhinitis and a separate one on asthma. And of course, there is a separate chapter on the gut microbes, a current very popular topic. A favorite chapter of mine is "Are Allergies Making you Fat?" Each chapter has at least one case study and at the end of every chapter is a summary. Susan Schenck, award-winning author of *The Live Food Factor* and several other books

The story is familiar to so many of us: You feel ill. Maybe things came on dramatically, maybe slowly, but your declining health is interfering with your otherwise amazing life. Nothing you've tried on your own has fixed it, so you go to a doctor, who orders tests - maybe a lot of them. For most people, this is where they get their answers. But for many, the tests come back with nothing remarkable; you're sent home with instructions to "reduce stress" or "wait to see if it goes away." But you do, and it doesn't. So you go to another doctor. And another. And another. You see countless specialists, you stay up all night reading studies and doing research to try to figure things out on your own, you try goofy woo-woo things that you know won't work because you're so desperate you need to try something - anything. The lack of answers makes you wonder if you're just lazy, or defective, or a hypochondriac. But no matter what you do, no matter how much you try to convince yourself you'll be fine, you don't feel better. The information in this book allows people with difficult-to-diagnose illnesses take action on their own, both to understand what might be causing their condition and to address it decisively. Not everyone's undiagnosed problems are associated with non-IgE allergy, but many, many are - and if yours is, you'll finally find some relief. And if allergy is not related to your problem, well - all you've lost is a bit of time and a few days of adjusted diet, and you'll have ruled out one more thing that will bring you a step closer to someday finding a solution to your problem. Well-researched, well-cited, well-written, and easy to understand, I hope this information helps you in the same way it has helped me.

The gist of Dr. Galland's solution is to start with an elimination diet, easier said than done. If you have a latex allergy (and who doesn't these days) he says to leave avocado and banana out of the 3-Day Power Wash smoothie. Well, a smoothie of strawberries, tea, greens, and chia seeds is a bit grim. But the science behind all the allergens in our lives reveals unexpected facts: garden tomatoes and ragweed season coincide to tip some people over the edge into full-blown misery, birch pollen and apples team up too. He describes the trade-offs of medication vs eliminating

allergens AND when to foods to which we're only sensitive, not truly allergic. A very good compendium of allergy facts, with some solutions, not exactly "The" solution.

I think this breaks down the issues contributing to asthma and allergy very well and I think it will be very helpful to many. I have some reservations about the power wash. It's all liquid and by day 2 I was a mess. And there's no protein! Except for avocado and chia seeds. I worried about that and felt kind of spacey (oolong tea is not coffee) so on day 2 I added chicken and rice, reasoning that I'm unlikely to be allergic to them. But today, as on the other days, I really don't feel any better. I'm still wheezing. I'll keep trying and maybe switch out the rice and chicken for lamb and sweet potatoes. And I'm going to stick with it to learn if any foods produce reactions. But it could be my issue is more environmental. The information on supplements and gut is also excellent.

I bought this book for my wife, she absolutely loved it. If you are an allergy sufferer, get this book, it will help you deal with the problem.

Good basic info, you may have to tweak advice for your own situation though.

Love this book!

An eye opener, a game changer, a great book.
