Ceramics

Customer Reviews

The founder of Wild Tiles Mosaics, Chrissie Grace spent over 13 years as an art teacher. She has been commissioned to do mosaics by the City of Orlando for their downtown sculpture program, for community elementary schools, and by private individuals.

I am new to the art of mosaics and found this book creative and interesting. It is definitely a beginner book but I believe it should be purchased with a basic technique book like The Practical Guide To Crafting With Mosaics by Simona Hill. I hope to replicate some of the projects and use the author's

other ideas as a springboard to create my own designs. I found the Majestic Roses mirror project to be simply beautiful as well as the You Are My Sunshine picture frame. I can understand why more experienced crafters might not have liked the ideas in this book, I'm sure they have created many similar projects; but I think there are some wonderful ideas for beginners.

This is a good book for the beginner tile maker.

I agree with the other reviewer, this book certainly didn't showcase "wild" mosaics. There are good basic tips on how to do mosaics but the actual projects are just so so....nothing exciting. I really can't recommend this book, the author seems like a nice person but this book isn't a must have by any means,

There are some good ideas in this book. Off the wall type projects but good stuff.

This is just another "beginner" book - though a bit above average for that category. From the title, I was expecting maybe at least one unique idea for inspiration, so that was a disappointment.

This book would be helpful for beginners who want quick easy projects that they want to make to keep or for a quick gift. Not for serious artists that are into the history and materials for more advanced projects.

I love the cover of this book and if the book would have contained more of what the cover projects it would have been great. Poor choice of projects and very boring. I would not recommend this book
