Customer Reviews

it's good quality for the price. the cards are glossy, intricate, and informative. And the box is nice too. It's good for a quick reference or something to put on your desk at the office. Other than that, I wouldn't use it for study review or 'flash card' review, since it's not very thorough. but for the price, it's what you expect.

Purchased two sets of these for my sister and son who are going to be taking A&P classes soon. Let me tell you THIS box of cards is impressive! My sister thought I spent over \$50 bucks for them. Winning.

Excellent cards, has not only the bones, also muscles, and nerves. I purchased them for my granddaughter. Cards were above my expectations.

I needed these cards for my anatomy and physiology class. The cards have a glossy finish. It has helped me to pass my class. It has alot of easy information to understand.

Super cool way to study for anatomy and physiology. Each card has many facets of information which cover so many points of study instead of just item classification. The pictures are realistic and well constructed and colorful for use over the years. Love them so much I bought them for a gift!

Personally its not helping me through A&P 1 but maybe this isn't my way to study. I need more practice questions so I got a barons book.

Not quite up to par with a certain set that happen to be a good deal more expensive, but the information in these cards has proven to be simply invaluable. I highly recommend to anyone struggling through A&P right now!

An excellent addition to any one preparing for nursing school and having to take A&P as a prep course
