# Oceanographers And Explorers Of The Sea (Collective Biographies)

## Synopsis

Biographies of ten scientists who studied the ocean, including physicists, environmentalists, geologists, and biologists.

## Book Information

Series: Collective Biographies

Library Binding: 128 pages

Publisher: Enslow Publishers (May 1999)

Language: English

ISBN-10: 0766011135

ISBN-13: 978-0766011137

Product Dimensions: 9.2 x 6.2 x 0.4 inches

Shipping Weight: 13.6 ounces

## Customer Reviews

Grade 5-8-Polking introduces 10 20th-century American oceanographers. Some are well known (Sylvia Earle, Eugenie Clark, Robert Ballard), while others are not so familiar (Henry Stommel, Ernest Everett Just). The brief biographies examine how these individuals became involved in their fields of study, where they studied and worked, and their accomplishments or discoveries. The explanations of theories and contributions are short and sometimes assume prior knowledge, e.g., in the Walter Munk entry, "In hospitals, a CAT scan uses X rays to map a part of the human body. At sea, scientists use computer-aided tomography with sound waves and other information to create a picture of the ocean." Peripheral topics aren't always clarified, e.g., the statement, "aspects of the gulf's geology were similar to other sea bottoms where a boundary between tectonic plates exists" is inserted without a discussion of tectonics. Drab black-and-white photographs appear throughout. Despite its flaws, the book offers fascinating details about these men and women and their contributions to science. Frances E. Millhouser, Chantilly Regional Library, VA Copyright 1999 Reed Business Information, Inc.

Polking profiles 10 scientists who have devoted their careers to ocean-related pursuits. She

includes Maurice Ewing (mapper of the ocean floor), Allyn Vine (developer of a deep-sea submersible, Jason), Eugenie Clark (the "shark lady"), and Robert Ballard (discoverer of the Titanic), among others. For each, she provides a thorough discussion of professional accomplishments and briefer comments on personal life. Each section is carefully footnoted; some sources include personal correspondence with the subject. Illustrated with black-and-white photographs, this will make an excellent starting point for report writers. The appended notes, bibliography, online resources, and list of oceanographic organizations will be useful for those needing more in-depth material, too. Kay Weisman
