## Customer Reviews

Everything from where to start to how to have a good swing. It is a good one considering that it is short.

Too much of a good thing. Having read the original, the condensation was overly concise. I would recommend the complete book to anyone interested..in Gladwell's views.

This books summary drove me to the conclusion as to what an outlier is. By pointing out samples is how,the summary unfolded to what the outlier could be. Since I'm very skeptic, this book is solely based on facts; so this way it helped a lot for ,e to understand what the point is. I would really recommend it to someone who just wants to read the definition and learn a few cool facts.

I highly recommend the book to everyone

What I most enjoyed about this book is that I am 48 years old and this was my first Trade book. I read this book for a business course but the concepts and ideas Gladwellll shares with us are relevant to everyday life

Good summary however I think concepts are poor and I really don't agree on some. There are much better books regarding this subject.

See above. Needed to elaborate more on what was relevant. Although concise, and although it is a Synopsys, I wanted a bit more. Maybe that's the reason... Buy the book! Hmmmmmm

Grammar, spelling, punctuation were distracting. Otherwise I would've given it four stars . The basic story was not bad though .
