Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking.Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

The map arrived on time.The only glitch was that whoever put the map in the envelope didn't do it carefully and it has now acquired a permanent diagonal crease.The map itself is excellent, detailed and very useful, especially when in the "Turkish" part of the Island, with the dual Greek and Turkish place names.

It's difficult to find good travel maps that are at a scale that is usable. This one looks great, and is a similar scale to others we have used. Maps seem so old school, but when you are traveling to places that have sketchy cell reception they are a small price to pay.

This map is useless to drive to Cyprus North. It doesn't show all roads, the names on the map don't match. The rental car company provided a map way more reliable and accurate at zero cost!

Good paper made of, detailed roads gives good oriantation to plan a trip i liked the map

It's alright. It looks like a printed version of google maps. I was hoping for just a little more detail in at least 2 or 3 of the main areas.

well not as effective as you would hope: better you would find out

The map was everything I was hoping for and more. The size is perfect and shows all the places we plan to visit and a few more.

great map, delivered on time
