## Customer Reviews

Yes, there are other books dealing with the art of applying different techniques to surfaces, covering painting, embossing, stenciling, and stamping. Not only does California artist Scrivano combine these four most popular methods but she also employs them easily, almost painlessly, on different home and wearable items. The idea is to give readers some basics of each technique, a few critical tips, and then showcase a bunch of decorated articles. In stenciling, for instance, she advocates using paper doilies or reversing the actual patterns for stencils, followed by a dragonfly suede table, among other ideas. All instructions are geared to beginners; the more than 45 patterns are intended as concepts, not actual patterns. Do it yourself starts right here. Sandy Scrivano is a contributor for Taunton Press titles including Creating Surface Design

In my opinion info is a bit vague in it's explanations. Didn't like it much. Best redeeming factor the price.

love it!

The book is well written and has great illustrations and especially good information on products for the beginner. It really shows how much fun textile surface design can be however I must stress that if you have done much work with surface design at all, this book will not be very challenging. It is a great book for beginners!.

What a lot of great ideas in this book. The instructions were easy to follow, and the designs were so beautiful. I am just a beginner with designing for my home, but with this book I know I can do it. Thanks for the wonderful book.

A GREAT BOOK! FAST DELIVERY!Pat Merkel
