Caribbean Classic [Tubed] (National Geographic Reference Map)

Synopsis

One of the most authoritative maps for the islands of the Caribbean Sea. It shows the entire region in great detail, with coverage extending from the tip of Florida to the northern extents of Colombia and Venezuela, east to Barbados, and west to the eastern edge of Honduras, Costa Rica, and Nicaragua. Detailed bathymetry reveals the remarkable seafloor variation of the Caribbean including the Puerto Rico Trench, the deepest point in the Atlantic Ocean at 8,605 meters (28,232 feet). Includes over 1,000 named places including country capitals, primary and secondary towns; political boundaries, important infrastructure, and all key landforms. Useful and informative notes about the region's history and unique geography are spread throughout the map, providing the reader further understanding of the Caribbean's unique attributes. The map is packaged in a two inch diameter clear plastic tube. The tube has a decorative label showing a thumbnail of the map with dimensions and other pertinent information. Map Scale = 1:3,286,000 Sheet Size = 36" x 24"

Customer Reviews

Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

I am a Chinese and when I look at this map I am satisfied with it in some way but it not the best map I've seen, it could be better because there are many provinces in China just like many states in USA, but the map dose not indicate the provinces which is not very good for the buyers to know the real China

First, I should point out that while I sympathize with the disappointment of the previous reviewer, his review does NOT describe THIS map. I'm not sure if he wrote his review under the wrong product heading or what, but this is the same as all other National Geographic wall maps, with the full image on one side and blank white space on the other. My only minor gripe with all of the NatGeo maps is that I would prefer the paper stock be a little heavier/thicker, but for the price, I really can't complain. All in all, a very nice, detailed map with a beautifully rendered image.

The map itself is fantastic--great detail, and a fairly good size for the listed price. Although I would recommend buying it, I would NOT recommend buying it from .com. When I received the map from , not only was the box in which it came too large, flimsy, and not protective, but when I opened it up, the map itself was creased several times before it was even placed in the wrapping, making it impossible to smooth out, and thus, permanently and severely bent.

This National Geographic laminated map of China is perfect for my intended use. It arrived rolled in its original shrink wrap, well padded in a box which was significantly larger than the roll. Adding another small item to my order allowed me free shipping, making it a great deal even when paying the list price. The map itself is the excellent quality expected of National Geographic products, with sturdy lamination. While I do not recommend the laminated version for travel use due to obvious folding issues, it is excellent for planning purposes or wall hanging.

Good size

i have undertaken an extensive review of chinese history and a map is essential to this study. it is also helpful to examinethe pinyin transcriptional methods. the map is 1:8,000,000 scale, but contains stunning detail of towns and geographicfeatures. i keep it handy to examine local events in the history as i come across them, and, with the use of coordinates,i find locations easily on this map. it serves as a good overview as more detail would require a smaller scale.

We are using this to tag our cruise trips. Nice quality and meets expectations. Recommend this to anyone who is looking.

In both English and Chinese, easy to read and navigate for the home traveler. We dry-mounted it on foam core and mounted it to the wall. We use color coded flag pins to indicate each family travels in China. We go often w/home in Guangzhou. Excellent quality that rivals the finest maps I've ever seen in Europe and Asia. Seller shipped them quickly in quality protective packaging.TNX!
