Customer Reviews

This is a great guide on NLP and how to use it in many areas of your life. It goes into detail on what NLP is and how it can benefit you. James shows you that by even just changing the words you use, will shift your focus on how you look at tasks. I really liked the section matching and mirroring and using this technique to build better rapport. I also think that in doing this it will produce better conversations and relationships, as the person you're talking to will gain your trust and be open to what you're saying. Great read!

I have been using these NLP techniques and for me the results were noticed very quickly. The author of this book does a great job getting to the point and empowering the reader with skills that not only work but exceeded my expectations. Whatever you want to accomplish in life this is a great book to have in your life skill toolbox. Highly recommended

I like what I am reading so far. Might make this review 5 stars when I get further into the book.

Not helpful

Im pretty familiar with NLP so alot of the things discussed Ive already learned about. I feel like overall it was a good intro book to NLP. I really liked that it introduced things like the importance of setting SMART goals. I feel like the book has a lot of areas that could be expanded on, such as anchoring or more examples of how it can be applied.

This is the all time book to reprogram oneself from negative talk to being positive. It'd amazing how much negative self talk is done daily. This book makes me aware of the negative self talks and most importantly how I should correct them. A must read even if you think you have a positive attitude, because you may be surprise you have a tad more negativity than desired.

This is a good way to improve your communication skills to apply to your team. Enjoy the book and looking forward to reading other books.

Being alone I seldom thought that do I always be like this, and think some negative thoughts. A must read even if you think you have a positive attitude, because you may be surprise you have a tad more negativity than desired.
