I saw other reviews about the blurry printing. I was hoping this level would be different, but it is also blurry. You can still use the maps (which are the most affected), but looking at it makes me feel like my eyes are out of focus!

our 8th grade student enjoyed this book and worked independently without a problem

The maps are so small and the print is very hard to read

Love, love love this company!! Colorful and clear. Great for homeschooling!

Excellent series. We have used them all.

The books in this series are just right. They don't take up much time but get the job done. On average, just one lesson a week. I love 'em! We have used all, A-H.

It was really good quick learning, since we are just building a foundation. My daughter had to do a report and this book made it so simple.

These books are a waste of money. They do not give enough information and instruction. If you homeschool, you'll be better off just reading books, magazines, etc. on different countries and drawing maps. I hated this book and so did my son.
