Yucky Worms: Read And Wonder

Synopsis

Hereâ€™s to natureâ€™s recyclers! Kids will burrow right into this book about the industrious â€” and danger-filled â€” life of the delightfully yucky earthworm. Who would want to be friends with a wiggly, slimy worm? You canâ€™t even tell which end is which! But thereâ€™s more to these lowly creatures than meets the eye. Kids are invited to find out where worms live, see how they move, and understand why gardeners consider them friends with the help of this humorous and informative look at an unappreciated â€” and fascinating â€” creature.

Vivian French is the author of a number of books for young readers, including GROWING FROGS, T. REX, and CATERPILLAR, CATERPILLAR. She lives in Edinburgh, Scotland. Jessica Ahlberg is the illustrator of HALF A PIG, written by her father, Allan Ahlberg. She lives in Brighton, England.

Great book. My now 3 yr young son really likes it. Any book that teaches kindness to insects and animals and encourages learning about these little creatures rather than fearing or killing or being ignorant or disgusted by them is absolutely wonderful, in my opinion. I really like this book a lot. My

son and I both like worms, and I'm really glad he is learning to treat other animals and insects with respect. I know far too many people, including children, who just want to kill and maim and torture smaller animals. This book definitely instills knowledge so we can better teach our children respect and compassion and foster a genuine interest in animals and insects of all shapes and sizes.

My granddaughter read the first half with me ... we are looking forward to finishing it. She had problems with a few words, but not many. It was fun to watch her attitude change about these fascinating creatures as we worked on the book. She just turned eight, and is in third grade.

Love this book! My son & I just started gardening. Part of our gardening project included vermicomposting (composting using earth worms), so as you can imagine, this book was quite appropriate & a real hit with my son. He has a real appreciation for the worms, and how they benefit our garden. Great book for little gardeners!

I got this book for my 3 1/2 year old grandson. He is a little young for it, but he did learn a lot. He especially learned about how worms digest food. I explained that people digest food too. Later, after my grandson ate lunch, he moved his stomach in circles. He said that he was grinding his food. This book also talked about the boy's good relationship with his grandma, which I liked a lot. I recommend this book. In fact, I bought another copy for my 2 1/2 year old grandson. He enjoyed it too, but didn't try to grind his food in his tummy.

This is such an enjoyable book. My 3 year old grandson is all about worms, slugs, etc. so he loved this book. And because it takes place in grandma's (nana's) backyard, it was believable and fun to read.

Fantastic book about worms for kindergarteners! In fact, I'm 42 and I loved it. Clear, concise, informative and fun to read! The kids loved it!

My son loves worms. We love this book. It presents so much information in a fun way with great illustrations.

Darling reader and informative
