Clinical Procedures For Physician Assistants, 1e

Synopsis

This concise, well-organized book is the first clinical procedures text written by physician assistant educators and practitioners for physician assistant students. It focuses on the 72 most frequently taught, commonly performed diagnostic and treatment-related procedures that practicing PAs need to know. Step-by-step, hands-on procedure sections clearly and precisely explain the 'how-to' steps of a procedure, while other sections provide essential diagnostic or treatment information such as indications, contraindications, essential anatomy and physiology, patient preparation, materials, and more. Chapters on Informed Consent, Standard Precautions, Patient Education Concepts, and Procedure Documentation discuss essential, non-procedural skills and considerations to ensure that readers have a comprehensive understanding of the use of procedures in physician assistant practice.

Book Information

Paperback: 450 pages

Customer Reviews

Richard W. Dehn, MPA, PA-C, Clinical Professor and Assistant Director, The University of Iowa College of Medicine, Physician Assistant Program, Iowa City, Iowa; David P. Asprey, PhD, PA-C, Associate Professor and Program Director, The University of Iowa College of Medicine, Physician Assistant Program, Iowa City, Iowa.

This book is pretty basic. It lists some useful things like pelvic exams, lumbar puncture and joint aspiration . It also wastes a bunch of pages on basics like drawing blood or taking a blood

pressure...things anyone at the PA (or PA student) level should already have mastered long ago.
Decent book to buy used in the \$10-\$15 range.

This was extremely helpful for me working in an urgent care as a physician assistant.

Dated but relevant. Excellent buy though.

Easy to understand

Love the book but the condition was less than stellar!
